Sponsor an Executive MBA for Global Supply Chain Student

11 months, 3 continents, 1 game-changing Executive MBA

ABOUT THE PROGRAM

Focusing on immediate relevance, the Executive MBA for Global Supply Chain (EMBA-GSC) at the University of Tennessee, Knoxville is a one-of-a-kind program created for companies that want to innovate, create competitive advantage, and develop their top talent. UT’s globally ranked supply chain management faculty deliver innovative and integrated curriculum in classrooms in Asia, Europe, and North America. Students learn alongside peer executives and deliver prompt financial returns to their organization through custom-designed projects that are directly linked to their employer’s strategic initiatives and operating plans.

WHY CHOOSE UT’S EMBA-GSC?

Curriculum: Relevant and Applied
Ranked as the No. 1 most relevant EMBA worldwide by The Economist, applied learning is emphasized throughout the year. While studying current end-to-end supply chain best practices, students have the opportunity to immediately apply what they learn at their business. The integrated curriculum is designed specifically for industry professionals and incorporates simulations, case studies, and applied learning projects. While exploring ethical, sociological, environmental, political, and regulatory issues, professors address real-world problems from multiple perspectives and focus on common challenges that executives share across all industries and countries.

Program Structure: Flexible with Minimum Disruption
Transform key talent in less than one year without removing them from their current roles. The EMBA-GSC allows for a high degree of flexibility, allowing busy executives to continue working and immediately apply their knowledge while pursuing a degree. A unique program structure integrates asynchronous online distance learning sessions with four residency periods, amounting to less than 30 days away from the office over the course of 11 months.

Unmatched Value: Immediate ROI
Sponsoring students in the EMBA-GSC program is a leadership development and talent retention tool for employers. The program’s design creates a strong bond between company and employee, unlocking the employee’s potential to deliver substantial value. The EMBA-GSC curriculum includes a number of assignments and an individualized Organizational Action Project (OAP), which are structured to immediately apply learning to the business, resulting in an exceptional ROI. EMBA participants complete an OAP focused on an issue important to their organization. Graduates have reported an average of $6.5 million ROI through OAPs alone, and less than 3% of alumni have left their organizations.

Industry Connections: Global Network of Experts
Students in our program immediately become part of an international network of supply chain executives and leading scholars. These networks can open doors to worldwide business opportunities that propel the growth of their organization. The program’s global structure covers an unparalleled learning opportunity to address the business, supply chain, and cultural requirements in multiple world locations. Ad-hoc benchmarking efforts regularly deliver significant value that far exceed program expenses.
